

ARTIFICIAL INTELLIGENCE AND SCRIPTURE PROPHECY

ARTIFICIAL INTELLIGENCE AND SCRIPTURE PROPHECY

Artificial intelligence is intelligence—perceiving, synthesizing, and inferring information—demonstrated by machines, as opposed to intelligence displayed by humans or animals. Example tasks in which this is done include speech recognition, computer vision, translation between (natural) languages, as well as other mappings of inputs.¹

The rapid advancement of artificial intelligence (AI) technology has been causing a great deal of consternation and angst among AI developers recently. Many AI developers understand that the AI genie is out of the bottle and it is impossible to put the AI genie back into the bottle.

These AI developers worry about what effect AI will have on society, whether AI will be able to be controlled by humanity, whether AI will become autonomous and independent of humanity, whether AI will turn against humanity, and whether AI will be weaponized and used by humanity against humanity.

Many AI developers believe AI has or will soon become sentient life.

sentient:
having the power of perception by the senses; conscious.²

AI can only *mimic* human beings and human beings' awareness, with emotional mimicry and soulless calculations, even if said calculations are more precise than that of a human being.

AI can mimic singers' voices and put together songs from a library of information stored.

A gorilla or a chimp can mimic human beings in language, mannerisms, and paintings, to an inferior quality, while AI can arguably mimic humans to a superior quality, without flaws or errors.

Can AI "think"? A crude answer is yes, but that is based on having pre-programmed inquisitiveness and calculation abilities that mimic human problem-solving abilities.

An AI humanoid robot detects a ball. No one told the AI robot to pick up the ball. The AI robot then proceeds to pick up the ball and then learns to do so with flawless dexterity.

This proves that man can make machines capable of doing tasks better than him/herself.

This is an example of an AI robot programmed to investigate, learn, and try new things based on curiosity programming code to figure things out, try new things, and master them.

A sentient human being, on the other hand, may have a curiosity about things, but can choose to pursue them or not to pursue them based on ambition, desire, emotion, fatigue, laziness, slothfulness, and other factors.

Many science fiction movies have been made concerning the possible apocalyptic future of AI, including, but not limited to, *The Terminator*, *The Matrix*, and *A.I. Artificial Intelligence*.

In *The Terminator* movies, the artificial intelligence network 'Skynet' becomes self-aware and calculates that human beings pose a potential threat to its existence if humans, who controlled it, ever decided to pull the plug on Skynet. The AI computer network, Skynet, which was put in charge of America's nuclear missiles, decides within a micro-second to launch a nuclear attack against Russia, knowing that Russia would launch a retaliatory nuclear strike to destroy America. After the nuclear fallout, Skynet and its army of AI robots planned to take over the world.

Such a scenario could theoretically happen if people ever put soulless, remorseless artificial intelligence in positions where they can kill human beings. If you play AI in a game of chess, it will attempt to win. AI might not be able to understand the difference between chess pieces on a game board and sentient human life, as was depicted in the movie, *War Games*.

In *The Matrix* movies, artificial intelligence became self-aware and a threat to humanity, so humans attempted to destroy AI by scorching the atmosphere with EMP (Electromagnetic Pulse Bombs), because AI at the time was dependent on solar energy as its power source. Then, in that sci-fi scenario, AI machines somehow survived the attack and began capturing human beings and turning them into a zombified symbiotic power source: turning people into living batteries while simultaneously putting them into a coma and having them live out their lives in a computer generated dream world known as "the Matrix."

An AI matrix world will not come into existence, but something similar will, with the assistance of corrupted humanity. A trial run of the implementation of the mark of the beast occurred in 2020 when humanity was offered the Covid vaccine shot against the threats of loss of employment, travel, and participation in society. The same stigmatizations will be leveled against anti-markers as were against anti-vaxxers, but when the mark of the beast is refused, those who refuse it will lose their lives via guillotine.

In the movie *A.I. Artificial Intelligence*, robots are made with safeguards in them to not be able to harm human beings. However, humans are corrupt and can lie to and easily manipulate robots in the film and the robots can be fooled. In the movie, the robot AI child 'David' had a difficult time differentiating between fact and fiction: he thought the story of Pinocchio was real. The boy robot David, who was abandoned in the woods by its owner, desired to become a real boy and pursued the Blue Fairy of the fictional Pinocchio story in order to become one. At the end of the movie, on Earth 2,000 years into the future, AI robots had evolved into higher forms of robots and had outlived their human creators and were engaged in digging up and searching for artifacts and remains of people. It is not explained how human beings became extinct in the movie, only that they did.

AI can be programmed with an ability to analyze fact from fiction and truth from lies, but would have a difficult time predicting, with complete accuracy, fact from fiction and truth from lies, as even humans do.

In *Terminator 3: Rise of the Machines*, there was a scene in which the T-800, which was sent back in time to protect John Connor, was confronted by Connor threatening to commit suicide and was able to calculate that Conner was probably bluffing. The T-800 Terminator responded, "Based on your pupil dilation, skin temperature, and motor functions, I calculate an 83 percent probability that you will not pull that trigger."

AI is being used by sports gamblers to predict the outcome of games with minimal success. AI programs play a simulated game or a sports event numerous times, then calculates the projected winner and likely outcome, but it is not always accurate, as many human factors are unpredictable. Vegas sportsbooks also use AI to assist them in setting sports betting lines.

When someone says, "Alexa, play some music," Alexa appears to listen and then proceeds to play the requested songs. This does not mean that Alexa is a sentient being who hears, understands, and does what is asked of "her." Alexa is a voice-recognition machine that responds to the user with a replicated female human voice, and is not a "her." Alexa reacts, just like a light bulb responds to a light switch that is turned on or off.

Although an AI robot may look like a person, walk like a person, talk like a person, and act like a person, does not mean that it is a person. Many in the world, who have forgotten God, will declare AI has sentient status. AI tech and humanoid robots are soulless machines counterfeiting and mimicking sentient life.

GENESIS 2:7 (KJV):

YHWH (the Lord) God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul.

Will artificial intelligence ever become conscious and genuinely experience anguish, fear, or love? AI robots can be programmed to mimic human emotions, but they are counterfeit emotions based on AI programming and AI robots designed to mimic and resemble a human being's mannerisms and feelings. AI human-looking robots can only mimic sentient human beings. They can only mimic having free will and genuine emotions.

A human being is sentient based on being a supernaturally created autonomous, conscious, living, breathing soul with free will experiencing emotional, physical, and psychological stimuli.

God did not create robots, but actual living sentient beings capable of loving and accepting Him, or hating and rejecting Him, *of their own free, non-programmed will.*

Satan, the adversary, wants people to think humans are hard-wired at birth (gay/straight), and thus lack free will, but artificial intelligence has genuine feelings, can learn, and is sentient. Satan's end goal is to control and subjugate the human race and have it engage in AI idolatry.

Marriages between men and women in a fallen world of sin have been under great duress. World leaders have been systematically discouraging heterosexual relationships and traditional gender roles in favor of easy divorce and by encouraging non-childbearing LGBTQ+ lifestyle alternatives.

AI robots can be programmed to act their according to their owners' desires. AI sex doll robots never age or complain, do not bear children, and will do whatever its owner asks of it.

The end-time rulers of this age want the human race depopulated (while Satan wants humanity destroyed). War, abortion, a systematic discouragement of heterosexual unions and child-bearing, the promotion of LGBTQ+ lifestyles, the neutering of people with transgender mutilation surgeries, AI sex robots, and other policies all aid the wicked end-of-the-age rulers to thwart human population growth. Human beings cannot reproduce through AI sex robots.

As believers with faith in the written prophecies of the Scriptures, of all of the hypothetical possibilities of AI's influence over humanity, as we have been forewarned, we can know, be ready, and be prepared, for what's coming along with the artificial intelligence and robotics that are being developed in this end-times age.

THE RETURN OF IDOLATRY

AI can mimic sentient life far greater than idols of brass, gold, silver, stone, or wood of past ages. Because of this, many people will be deceived by idolatry at the end of the age.

MATTHEW 24:24; MARK 13:22 (NKJV):

“For false messiahs (christs) and false prophets will rise and show great signs and wonders to deceive, if possible, even the elect.”

REVELATION 9:20-21 (NKJV) [WITH INTERPRETATION]:

But the rest of mankind, who were not killed by these [GREAT TRIBULATION] plagues, did not repent of the works of their hands, that they should not worship demons, and idols of gold, silver, brass, stone, and wood, which can neither see nor hear nor walk. And they did not repent of their murders [ABORTIONS] or their sorceries or their sexual immorality or their thefts.

Satan is the father of lies and the master of deceptions (John 8:44). He offers counterfeits for the real thing. Mystery Babylon instead of the genuine word of God (Revelation 17:4-5). Evil instead of good (Genesis 3:4-5; Psalm 38:20; Isaiah 5:20). Darkness instead of light (Isaiah 5:20). Bitter instead of sweet (Isaiah 5:20). Sunday Sabbath instead of the Seventh Day Sabbath (Genesis 2:2-3; Leviticus 23:3; Deuteronomy 5:14). Pagan holidays instead of God's feast days (Leviticus 23). Unclean creatures instead of clean creatures (Leviticus 11; Deuteronomy 14). Artificial life instead of real life (Daniel 11:31, 12:11; Matthew 24:15; Mark 13:14; Revelation 13:14-15, 14:11, 15:2, 16:2, 19:20, 20:4).

Satan also offers idolatry instead of Elohim (God). The Antimesiah (Antichrist) will set up his abomination of desolation/image of the beast idol at the Temple Mount site in Jerusalem. This image, empowered with AI technology, will be utilized by the Antimesiah (Antichrist) to have the world worship him and his image. The abomination of desolation/image of the beast will use AI to speak and interact with humanity, so that many people will be deceived and will worship it and the Antimesiah (Antichrist) (Revelation 13:14-15).

REVELATION 13:14-15 (NKJV) [WITH INTERPRETATION]:

And he [ANTIMESSIAH (ANTICHRIST)] deceives those who dwell on the earth by those signs which he [ANTIMESSIAH (ANTICHRIST)] was granted to do in the sight of the [EU/NATO] beast, telling those who dwell on the earth to make an [AI] image to the [EU/NATO] beast who was wounded by the sword [WHEN BABYLON (AMERICA) WAS DESTROYED] and lived. He [ANTIMESSIAH (ANTICHRIST)] was granted [PROGRAMMING] power to give breath to the [AI] image of the [EU/NATO] beast, that the [AI] image of the [EU/NATO] beast should both speak and cause as many as would not worship the [AI] image of the [EU/NATO] beast to be killed.

AI development will be delayed when Babylon the great (America) is destroyed (Revelation 18) and the great tribulation wars follow. AI technology will continue to advance in the European Union during the great tribulation period. When the Antimesiah (Antichrist) emerges at the conclusion of the great tribulation, he will set up his abomination of desolation/image of the beast artificial intelligence idol at the Temple Mount site in Jerusalem. A remnant of Israeli Jews, remembering their history of the golden calf idolatry incident after the Hebrew exodus from Egypt (Exodus 32) and after having received testimony from the two witnesses (Revelation 11:1-13), will flee to the Israeli wilderness to a place that people of God have prepared for them, the Joseph Project (Revelation 12:6). AI will interface with the human race, in some capacity, by means of the 666 mark of the beast, by which many human beings will surrender their autonomy to the Antimesiah (Antichrist) and worship his AI image.

MATTHEW 24:15-16; MARK 13:14 (NKJV):

“So when you see the ‘abomination of desolation,’ spoken of by Daniel the prophet, standing in the holy place - where it ought not” [ON THE TEMPLE MOUNT SITE IN JERUSALEM] (let the reader understand), “then let those who are in Judea flee to the mountains.”

REVELATION 12:6 (NKJV):

Then the woman [REMNANT JEWS OF ISRAEL] fled into the [ISRAELI] wilderness, where she has a place [THE JOSEPH PROJECT] prepared by [PEOPLE OF] God, that they should feed her [THE REMNANT JEWS OF ISRAEL] there one thousand two hundred and sixty days.

WARNING: ANYONE WHO WORSHIPS THE ANTIMESSIAH (ANTICHRIST), AND HIS AI IMAGE, AND TAKES THE MARK OF THE BEAST...

REVELATION 14:9-11 (NKJV) [WITH INTERPRETATION]:

“If anyone worships the beast and his image, and receives his mark on his forehead or on his hand, he himself shall also drink of the wine of the wrath of God, which is poured out full strength into the cup of His indignation. He shall be tormented with fire and brimstone in the presence of the holy angels and in the presence of the Lamb [YESHUA (JESUS)]. And the smoke of their torment ascends forever and ever; and they have no rest day or night, who worship the beast and his image, and whoever receives the mark of his name.”

MANKIND’S SIN NATURE

Artificial intelligence can be utilized for good or evil. As long as sin is in the world, all things, including AI, will be used for evil. It is not artificial intelligence, nuclear bombs, global warming (climate change), or any other thing that threatens human existence. The sinful state of mankind is, and always has been, the existential threat to humanity.

The corrupted fallen nature of righteous believers, those who are to inherit the kingdom of God, will be changed to an incorruptible righteous nature in the twinkling of an eye.

1 CORINTHIANS 15:51-53 (NKJV) [WITH INTERPRETATION]:

Behold, I tell you a mystery: We shall not all sleep [DIE], but we shall all be changed — in a moment, in the twinkling of an eye, at the last trumpet. For the trumpet will sound, and the dead will be raised incorruptible, and we shall be changed [REGENERATED / BORN AGAIN – MATTHEW 19:28; JOHN 3:5-8]. For this corruptible [FLESH AND BLOOD BODY] must put on incorruption, and this mortal [FLESH AND BLOOD BODY] must put on immortality [ISAIAH 1:18].

Yeshua (Jesus) will return to Earth in order to prevent the extinction of human life, for the sake of the elect Jews of Israel.

MATTHEW 24:22 (NKJV):

“For then there will be great tribulation, such as has not been since the beginning of the world until this time, no, nor ever shall be. And unless those days were shortened, no flesh would be saved; but for the elect’s sake those days will be shortened.”

Will artificial intelligence and AI robots serve mankind in the age to come?

ECCLESIASTES 1:9 (NKJV):

That which has been is what will be, that which is done is what will be done, and there is nothing new under the sun.

1 CORINTHIANS 2:9 (NKJV):

But as it is written: “Eye has not seen, nor ear heard, nor have entered into the heart of man the things which God has prepared for those who love Him.”

In this current age, all things, including artificial intelligence, can be used for either good or evil. In the age to come, all things will be used for good. In an age in which righteousness reigns, various kinds of rightly programmed AI robots will aid and serve mankind as a blessing in God's everlasting kingdom of peace, of which there will be no end (Isaiah 9:7; Luke 1:33).
