

BY SORCERY ALL THE NATIONS WERE DECEIVED

By George Lujack

The book of Revelation reveals that in the end times, sorcerers practicing sorcery will deceive people in the world. Scripture groups the serious sin of sorcery with the cowardly, abominable, unbelievers, murderers, sexually immoral, idolaters, thieves, and liars. This article will identify who these end-times sorcerers are and will serve as a warning for believers to avoid them and their sorcery.

REVELATION 9:21 (NKJV) [WITH INTERPRETATION]:

And they did not repent of their murders or their sorceries [PHARMAKEIA] or their sexual immorality or their thefts.

REVELATION 18:23 (NKJV) [WITH INTERPRETATION]:

“For your merchants were the great [WEALTHY] men of the earth, for by your sorcery [DRUGS, MEDICINES, PHARMAKEIA] all the nations were deceived.”

REVELATION 21:8 (NKJV):

“But the cowardly, unbelieving, abominable, murderers, sexually immoral, sorcerers, idolaters, and all liars shall have their part in the lake which burns with fire and brimstone, which is the second death.”

REVELATION 22:14-15 (NKJV):

Blessed are those who do His commandments, that they may have the right to the tree of life, and may enter through the gates into the city. But outside are dogs and sorcerers and sexually immoral and murderers and idolaters, and whoever loves and practices a lie.

sorcerer:

a person who claims or is believed to have magic powers; a wizard.¹

Who are these sorcerers and wizards that Scripture mentions?

Traditional sorcerers and wizards exist mainly in the science fiction realm and in fantasy tales. While it is good for believers not to indulge in worthless fictional stories of sorcerers, Scripture does not address science fiction tales of sorcery, but sorcery that exists in the real world.

Sorcery, or by another translation, pharmakeia, mentioned in Revelation, refers to traditional Western allopathic doctors (sorcerers) and their medications (potions). Most of the medicines of the Medical Industrial Complex are aimed at temporarily relieving the symptoms of a disease, but not curing the disease itself.

People, even believers, like sheep to the slaughter, keep trusting and going to traditional, conventional doctors in times of sickness and wellness. And what do conventional doctors and medicines do to people? Western medicine often sickens people and expedites their deaths, under the pretense of attempting to keep them healthy and heal them.

DR. LEONARD COLDWELL

“So, basically, we are born perfect, and then they start messing us up.”

The first way the doctors/sorcerers mess us up is through unsafe, ineffective, unclean, and unnecessary vaccinations. Various vaccinations have been derived from the ovaries of worms, dog kidneys, calf blood, guinea pig embryos, and aborted babies. When looked at objectively, do these vaccines not contain the same type of ingredients that you would expect to find in a witches’ brew? The derivatives of these various animals and aborted babies are included in vaccines. Revelation warns that the sorcerers of the end times will not repent of their sorcery and will continue to push vaccines and their medications upon the world (Revelation 9:21).

BELIEVERS ARE COMMANDED NOT TO TOUCH (OR INJECT) WHAT IS UNCLEAN

2 CORINTHIANS 6:17-18 (NKJV):

“Come out from among them and be separate,” says the Lord.

“Do not touch what is unclean, and I will receive you.

I will be a Father to you, and you shall be My sons and daughters, says the Lord Almighty.”

PETER GLIDDEN, ND

Interviewer:

“How many people do you think ... the cause of death is usually cancer. How many people do you think actually died from cancer vs. a treatment that usually got them towards the end?”

Peter Lidden, ND:

“You can't know, and that's a great question. I mean that should be mandatory, that should be figurably outable, right. That should be part of the death certificate, it should be part of the process, but it's not.

I'm of the opinion that chemotherapy kills just as many people as cancer does.”

DR. LEONARD COLDWELL

Interviewer:

“You touched on the American Cancer Society. What's your thought on organizations like that, the Susan G. Komen Foundation, um, there's a breast cancer awareness month, there's fundraisers every week in every town raising hundreds of millions of dollars a year, and yet we're not any closer to winning this war on cancer. What are your thoughts of those organizations that raise just an unbelievable amounts of money yet with no progress?”

Dr. Leonard Coldwell:

“First of all, to me, it's all a hoax, it's all fraud. Even the people in it, they often think it was a right thing. But here's the answer. Where does the money go that they raise? Back to the pharmaceutical industry, back to the medical industry for research. We have 400 known cancer cures out there, natural cancer cures, there's no side effects. So there is no need to research anymore for the cancer cure because there are more than enough out there. And personally, having personally been known as the person with the highest cancer cure rate in the world by independent studies, by so many experts out there, I can tell you there are so many cancer cures out there and I have seen cancer like Dr. Tullio Simoncini was a spoke ah cancer as a fungus. He puts just baking soda, sodium bicarbonate, with a water solution, watered-down solution on the cancer - the cancer tumor disappears on contact because the white mass that every cancer has is a fungus, and if you alkalize a fungus, it instantly disappears, and therefore the tumor disappears. The dead, cancerous growth disappears. And we all really need to look into not walking for the cure, and not buying a pink ribbon, because it's all fraud. It all goes in the same people that cause your cancer, in the pockets of the same people that cause your cancer, the pockets of the same people that live off you having cancer, and um, they're creating more complicated treatments and surgeries to charge more and more and more, because today as far as I know if

you're diagnosed with cancer if you don't have the right kind of health insurance, um, you're kind of like broke after three months, and that's what they like because if you're broke you are willing to do everything the government tells you to do. You have no money for a lawyer, you have no money to fight back, you have no money for research, you don't even have money anymore for alternative natural cures. And, um, people need to stop donating to these organizations instantly, because they waste their money, and the money goes directly to the criminals that are responsible that the cancer rate is that high. And, if you just research all these people out there that are curing cancer, why don't you go to people that produce results, and say, 'How did you do that? Let us research that!'

Why do you think Max Gerson, when Gerson cured all these people just by changing their diet or the public diet, ah, with cottage cheese, um, sodium bicarbonate, baking soda with maple syrup – you warm it up a little and it comes kind of like a candy kind of a thing and you eat that to alkalize your system. Because, if you just look at the facts, Otto Warburg and Max Planck got a Nobel Prize in medicine in 1911 and 1936 by proving cancer cannot exist in an alkaline, oxygen-rich environment. So, why didn't we move on from there? Why didn't we do more research and say, 'Oh, how can we get the body alkaline?'

And, um, there are so many easy ways; if you have a gallon of water a day with half a teaspoon of pink salt in it a day, Himalayan salt, it still has all the trace minerals, and most of all, if you, uh, just look for nature, if it didn't exist 150-years-ago, you do not need it. You don't want it, you don't need it. Most of all, it's a cowardly way of getting rid of guilt, donating to organizations.

See, we are Americans, we are not our government. Our government has nothing to do with us. And, anything that's out there to me in my experience and my thinking of the law is treason to begin with. Taking away healing substances, healing treatments, it's murdering or raging a war against your own people. This is by my definition treason, high treason and I don't even know how they get away with this any longer, but there is more and more people waking up, there is more and more people being ready to fight and willing to fight, because everybody now has one or two people in his family that died of cancer. Now we have people, parents, their children get taken away because they refuse vaccination or they refuse, ah, killing, murderous treatments for cancer, and if you just look at the information sheet that comes with the chemotherapy, it says there death as a side effect. That radiation causes cancer, everybody knows that. Chemotherapy is based on mustard gas. Mustard gas, after the Geneva Convention, is forbidden as a war chemical. It was created in the First and Second World War to kill soldiers on the battlefield. Now they put it directly into your bloodstream and after one single chemotherapy, you cannot donate blood anymore or be an organ donor.

What does that tell you about your health?

And, so, please don't donate to any organization. 76 percent usually stays only in their own pockets to begin with and the rest goes usually back to the medical and pharmaceutical industry. From there, research on cancer, not on the cancer cure, not on curing the patient, it goes back to cancer research."

Interviewer:

"The answer to cancer is already inside you, and what Dr. C teaches people is how to unlock that. So, talk about decentralization, and one of the things I, that you mentioned Dr. C, during that introduction there, is that if you have cancer as a person, there is something in your life that you did, there are decisions that you made that led to that cancer, and that's the opposite of what modern medicine teaches people. A doctor will say, 'Oh, there's nothing you could have done to not be diabetic or to not have cancer.' They'll say, 'Look, your mom is diabetic, therefore it's genetic. You have no control. You have no power. I have the power of the doctor! I have total power and control over your life. Give your power to me, the doctor, and big pharma, and then we will treat you, but never cure you. And you see, but people believe that crap. They believe that crap. They give their authority over to the doctor and then they die from chemo."

Dr. Leonard Coldwell:

"My dad was brainwashed into believing all this stupidity. Dr. Gary Null conducted a 7-year study, 'Death by Medicine,' decades ago, and concluded the main cause of death, uh, in the Western world is a medical doctor, and the main cause of illness is the pharmaceutical industry."

DR. JED HILL, PLAYED BY ACTOR ALEC BALDWIN, "MALICE," 1993

"The question is, do I have a God complex? Which makes me wonder if this lawyer has any idea as to the kind of grades one has to receive in college to be accepted at a top medical school. If you have the vaguest clue as to how talented someone has to be to lead a surgical team. I have an MD from Harvard. I am board-certified in cardiothoracic medicine and trauma surgery. I have been awarded citations from seven different medical boards in New England, and I am never, ever sick at sea. So I ask you, when someone goes into that chapel and they fall on their knees and they pray to God that their wife doesn't miscarry, or that their daughter doesn't bleed to death, or their mother doesn't suffer acute neural trauma from post-operative shock, who do you think they're praying to? Now, go ahead and read your Bible, Dennis, and you go to your church, and with any luck you might win the annual raffle, but if you're looking for God, he was in operating room number two on November 17th, and he doesn't like to be second-guessed. You asked me if I have a God complex. Let me tell you something. I am God."

A message to any doctors out there, who may think that they are God, or that they can play God, or that they have the noblest profession... You are not God, and depending on the type of medicine you are practicing, you may be judged as a sorcerer by God.

JESSIE ASSEO

“There is not a single pharmaceutical drug out there without a side effect. Which is treated with another pharmaceutical. When we collectively understand that they don’t create cures, they keep customers. The agenda dies, and people get healthy.

MEL GIBSON; ACTOR, DIRECTOR, PRODUCER

“And, I’ll tell you a good story. I have three friends, all three of them had stage-4 cancer. All three of them don’t have cancer right now at all. And they had some serious stuff going on.”

Joe Rogan:

“And what did they take?”

Mel Gibson:

“They took some... what you’ve heard they’ve taken.”

Joe Rogan:

“Ivermectin, Fenbendazole. Yeah, I’m hearing that a lot.”

Mel Gibson:

“They drank hydrochloride something or other.” (Hydrochloroquine).

Joe Rogan:

“There’s studies on that now where people have proven that...”

Mel Gibson:

“People drinking methylene blue.”

Joe Rogan:

“Yeah, methylene blue which was a fabric dye. It was a textile dye. And they found out it has profound effects on your mitochondria.

Mel Gibson:

“This stuff works man.”
